

Aerial Work Platforms

Aerial Work Platform - There are numerous attachments for lift trucks that could be used so as to help expand the functionality of your forklift and allow you to pick up objects, handle materials with greater ease or to accomplish clean-up tasks.

Several of the accessories are specially designed to fit on the forks themselves. Blade extensions for instance, are used whenever you need a lot more fork length, which increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded attachments are another variety used when transporting rolled material in order to ensure it does not roll off of the standard flat blades.

Examples of lifting attachments include pivoting and telescoping boom or crane attachments. They could come in quite a few various styles and are normally meant for transporting lumber, poles, metal bars and different sort of bulky objects. Other accessories like different kinds of hooks and hook plates are obtainable to lift stuff with a sling or chain. Slab lifters and magnetic filters are other things that can be used with hook accessories. Slab lifters are specialized accessories that are intended for lifting various materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that attach to your forklift to be able to make transferring rolls of carpet much easier. The attachment hooks onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are various kinds of lift truck attachment utilized for facility maintenance such as snow blades. These industrial blades can be connected to front end loaders and designed for transporting materials like for example snow, dirt as well as mulch. Other common cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the forklift forks connect onto for sweeping large spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments like on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up simple and quick.

A material spreader is another forklift accessory which is normally utilized at facilities. These spreaders are handy for various applications like spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Another optional lifting accessory are work platforms. These can be used by numerous different businesses daily. Platforms may vary in size from 36" x 36" to up to 60" x 60". Several models may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location utilizing the lift truck. Larger platform models have additional space for personnel to bring tools and other necessary stuff meant for the task. Usually work platforms are constructed of poly material or steel.
